

Mekaster on the occasion of NAM-Mekaster Dinner meet

Non-Aligned Movement was started by the first Prime Minister of India, Pt. Jawaharlal Nehru, in association with the President of Egypt H.E. Gamal Abd-al-Nasir, President of Indonesia H.E. Sukarno and the President of Yugoslavia Marshall Tito.

All these leaders got together and started the Movement which was basically a Political Movement. Today, the Economy and Politics go together!

The World is a global village and India has its role to play. Our Professionals and Materials, Science and Technology are well accepted the world over. Our capabilities in Engineering and Scientific products are well appreciated and our knowledge is in demand.

MEKASTER has taken unique initiative to share - whatever we have gained in the last 4 decades of our existence – with our friends in the form of Projects, Consultancy or Products.

Through the present forum for NAM, MEKASTER would play a proactive role for promotion of self reliance amongst the developing countries, in particular, with Member countries of the NAM, in the areas of Construction Engineering, Industry for Infrastructure development, Information and Communication Technology as well as Alternate Energy Source.

In India, Mekaster has more than 400 sites being serviced with our equipments and 200 more sites will be added this year. We trust that our initiative in joining the NAM Science Centre would be worthwhile for all of us!

I must thank Dr. Kulshreshtha - whose far-sighted vision and International relationship with regard to the development of Science is well known and we look forward to work together!

JAI HIND!
